e-con Systems launches an Android USB Web Camera App for Phones / Tablets

e-con Systems launches Webeecam, an Android Application which enables you to connect a Webcam to your Android Phone/Tablet

St. Louis, USA / Chennai, India – Aug 26, 2015 - e-con Systems Inc., a company specializing in imaging solutions and Camera boards, modules has developed a USB camera application for Android Phones and Tablets - Webeecam. Webeecam supports any camera that conforms to the USB Video Class Specification (UVC) which includes an array of off-the -shelf webcams. This makes your USB camera portable and allows you to instantly share the captured images using any social media applications. e-con Systems' intends to add new features every month like the ability to connect multiple UVC USB cameras to the phone/tablet.

"With the next generation of applications and products built around tablets and phones, there is an increasing need for interfacing the common PC peripherals such as USB webcams with these mobile devices. Our Webeecam enables off-the-shelf USB UVC webcams and other specialty UVC cameras such as Microscopes, Borescopes, Thermal cameras etc. on phones and tablets, where tablets can become the processing platform with rich user experience. Customers can benefit from e-con's expertise to interface specialty cameras with any off-the-shelf Android Phone or Tablet to develop novel applications around these Android devices" said Ashok Babu, President of e-con Systems.

Watch Intro Video of Webeecam

Webeecam provides access to all UVC camera controls like brightness, exposure, etc. supported by the USB Camera and supports all resolutions available with the USB Camera. Apart from Webcams, Webeecam can be used with USB Borescopes, Microscopes and other specialty USB cameras as well.

Customization services
